PROFILE

Dedicated and efficient full stack developer with 2+ years of experience in Full stack web application development, and databases.

As a full-stack developer, I have worked using a range of different technologies and languages such as JavaScript, Python, HTML, CSS, React, Angular, Node.js, Django, Flask, etc to develop applications. I am comfortable with both front-end and back-end coding languages, development frameworks, and third-party libraries. I have participated in the design and creation of scalable software. Written clean, functional code on the front-end and back-end. Tested and fixed bugs and other coding issues. I am also a team player with a knack for design and utility. And I am also familiar with Agile methodology with experience working on Scrum-based project development.
